Hiring Manager  
Microsoft Corporation  
1 Microsoft Way  
Redmond, WA 98052

Dear Hiring Manager,

I am writing to express my interest in the “Software Engineer: Fullstack Intern” position at Microsoft. With my background in Computer Science and experience in Software Development, I am excited by the opportunity to contribute to Microsoft’s mission to empower every person and every organization on the planet to achieve more.

My education at the Georgia Institute of Technology has given me a strong foundation in object-oriented programming and scalable design principles, which I have applied through both coursework and projects in the iOS Club. In these settings, I have implemented design patterns such as Singleton and Factory to build reliable, maintainable applications while collaborating with peers in team-based development. This collaboration culminated in winning the end-of-semester app competition, judged by external industry professionals for best overall application. This experience has not only strengthened my technical skills but also reinforced the importance of teamwork in delivering meaningful software—values that align closely with Microsoft’s emphasis on building scalable, user-centered technologies through collaboration and innovation.

During my internship at Amazon, I was tasked with integrating a new hardware device with an outdated Socket Service—a challenge that shaped my approach to problem-solving and systems design. To ensure a smooth rollout, I collaborated across teams using Trello for coordination and leveraged AWS services such as Lambda and S3 to deliver a scalable solution. By resolving a critical blocker, I ensured the integration was completed on schedule and enabled the device team to move forward with production. This experience highlighted my ability to balance innovation with reliability in high-stakes projects, a mindset I look forward to bringing to Microsoft.

With my academic and professional experience in software development, I am confident that I can make a meaningful contribution to Microsoft’s continued growth and innovation. My enclosed resume provides further details about my background. Thank you for your time and consideration—I look forward to the opportunity to contribute to Microsoft’s mission and to grow as part of your team.

Kind Regards,

*Connor Case*
